

Meeting Minutes 12/01/2022

Team: 109, Date: 2022/01/10

Present: Aarsh, Jingfei, Ross, Ryan; **Absent:**

Agenda:

Decide who to interview

Notes:

People to interview:

- Course staff
- friends outside this course

Tentative Feature Ideas:

- The ability to switch between multiple notes/documents, and have structured file folders
- Support text customization (font size, color, family, bold, underline, italic)
- Support markdown, or formula rendering tool
- Sync/back up functionality to the cloud
- Concurrent read/write with classmates/others with permissions
- Text matching search on all the files users have access to
- Export notes to PDF

Decisions:

Application's target users will be students (specifically in STEM), software developers, etc. that require writing pseudo code and math equations (latex and/or markdown)

Application will be developed for Desktop (Mac and Windows)

TODO:

Each person interviews 1~2 people

Aarsh 1

Jeffer 1

Ryan 2

Ross 2
